Assignment -3

Python Programming

Assignment Date	30 September 2022
Student Name	Sneha.P.S
Student Roll Number	311419205040
Maximum Marks	2 Marks

Problem Statement :- Build CNN Model for Classification Of Flowers

- Download the Dataset : Dataset
- Image Augmentation
- Create Model
- Add Layers (Convolution,MaxPooling,Flatten,Dense-(Hidden
- Layers),Output))
- Compile The Model
- Fit The Model
- Save The Model
- Test The Model

Solution:

```
# Used for manipulating directory paths
import os
import shutil

```

```python
# start training
'''
verbose - 0 shows nothing; 1 will show animated progress bar; 2 will only mention the number of epoch.
batch_size - the number of samples that will be propagated through the network.
epochs - an arbitrary cutoff, use to separate training into distinct phases.
'''
History = model.fit(trainImg, trainLabel, batch_size=batch_size, epochs = epochs, validation_data = (validImg, validLabel),verbose=1)
